

Australian Mining Product and Services Pty Limited

▲ Cobra Head Flat Spray Nozzles

Cobra Head nozzles have many applications including:

- · Wet screening · Ore washing · Cooling · Medium recovery
- Froth suppression Conveyor belt cleaning
- · Slimes Removal · Dust suppression

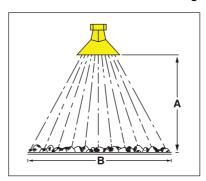

This range of nozzles is designed to handle fluctuating solid contents without blocking.

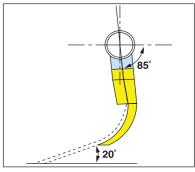

DESIGN FEATURES

- Male connection: 3/4" BSP pipe socket
- · Polyurethane construction
- Non blocking orifice sizes: 3, 5, 7, 9, 11mm (circular)
- Flow rates: see graph belowCorrosion and Wear Resistant

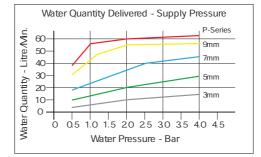

SPRAY CHARACTERISTICS

- · Spray pattern: Flat fan
- Dimensions: see table below
- · Uniform water curtain with high operating efficiency

The P-Series nozzles operate with maximum efficiency in the 1.5 to 25 bar pressure range.

HEIGHT 'a' (mm)		2000	300	400
SPRAY SIZE (ORIFICE)	PRESSURE (BAR)	OPERATING WIDTH OF SPRAY - 'b' (mm)		
3	1.5	400	500	700
	25	500	600	800
5	1.5	400	500	700
	25	500	600	800
7	1.5	350	450	500
	25	400	550	700
9	1.5	500	600	800
	25	600	700	1000
11	1.5	500	600	800
	25	600	700	1000

The data tables give a guide to the size and number of sprays and the optimum height and operating pressure. For most operations, the angle to install the spray is 20° as shown.
